

SASS (SCSS) – Mixins, Variables & Include Guide

1. Variables

```
$primary-color: #3498db;
$padding: 10px;

button {
  background-color: $primary-color;
  padding: $padding;
}
```

2. Mixin

```
@mixin flex-center {
  display: flex;
  justify-content: center;
  align-items: center;
}

.container {
  @include flex-center;
}
```

Diagram

@mixin → @include → CSS Output

3. Mixin with Parameters

```
@mixin button($bg, $color) {
  background-color: $bg;
  color: $color;
}

.btn {
  @include button(blue, white);
}
```

4. Default Values

```
@mixin card($padding: 20px) {
  padding: $padding;
}

.box1 { @include card; }
.box2 { @include card(40px); }
```

5. Real Example

```
@mixin flex($dir: row) {
  display: flex;
  flex-direction: $dir;
}

.nav { @include flex(row); }
.sidebar { @include flex(column); }
```

Summary

Variables = values

Mixin = reusable code

Include = use mixin
